

LIGHT BULB RECYCLING

FLUORESCENT LIGHTS ARE CONSIDERED HAZARDOUS WASTE AND CANNOT BE THROWN IN THE TRASH

Fluorescent bulbs and tubes are filled with mercury vapor that emits ultraviolet light when electricity is applied. The bulbs/tubes have a coating inside that turns the ultraviolet rays into visible light.

THE HOME DEPOT

Customer Service Desk
27952 Hillcrest (just north of Saddleback College)
949-364-1900
